1. **[3 marks] Code writing.**

   Complete the following function according to its docstring.

```
def sum_digits_in_string(s: str) -> int:
    """Return the sum of all digits found in s.

    >>> sum_digits_in_string('123abc')
    6
    >>> sum_digits_in_string('a9f3t6')
    18
    >>> sum_digits_in_string('xyz')
    0
    """
```
