1. **[6 marks] Short answer.**

Each of the following interactions in the Python shell ends with an expression and blank space. For each one, write the value that would be displayed in the blank space, or the word NOTHING if nothing would be displayed. *If evaluating the code would cause an error, write ERROR* ***and*** *briefly explain why the error would occur.*

Solution

```
>>> message = 'Beware the Ides of March'
>>> message[2] + message[-2]
'wc'

>>> max('fernando'[ : : 3], 'fernando'[1 : : 3])
'fnd'
```
