ECO333H1F: Urban Economics
Fall 2025
Fern Ramoutar
Problem Set 2

Submit by 10/7 at 5 pm via Quercus. You are responsible for ensuring your file is viewable/not corrupted. Late submissions will not be accepted for this problem set because the solutions will be covered in tutorial on 10/8.

These questions are designed to help evaluate your understanding of the course material, and prepare for the exams. Given that you will not be allowed to use LLMs or any other assistive technologies for the majority of the evaluations in this course (i.e., quizzes, midterm, final exam), I would strongly advise that you first try to work through the homework without them. If you are unable to solve a problem, that is a useful thing to be able to recognize and address. If you have any questions or get stuck, I encourage you to work with a classmate or ask me or the teaching assistants for guidance.

1. **Measuring Urban Density.** You read the paper *The Economics of Urban Density* by Duraton and
