LINB09 – Phonetics, Fall 2026

Homework 6

TUT6/Task 4

Sounds in context: On Tuesday we introduced the following phonetic processes that apply to **oral stops** in English:

aspiration (strong and weak)

devoicing

full voicing

flapping or tapping

glottalization and glottal reinforcement

inaudible release

nasal plosion

lateral plosion

advancement

Provide a narrow transcription of the following words according to the phonological process specified in the rightmost column. Enclose each transcription in square brackets and use the appropriate IPA diacritics:
