Before you begin your first problem set, the teaching team has a few suggestions:

- Start early! Some of the problems you may not be able to start yet, but the first four problems are doable with all the material covered so far.
- Do your scratch work separately. Your final writeup should be a clear, legible proof, written with full sentences.
- Our hope is that none of the proofs should take more than a page, written with 12 pt font size. Please try to stay under one page, at most two. You should use a new page for your solution, not the pdf provided.
- Please make sure your handwriting is not too small to read when viewing the full page - this will make grading much easier, and allow the TAs to leave better feedback.
- If you're stuck, don't forget to attend office hours and ask questions on Piazza. You can't give or get full solutions, but someone may be able to help you understand the problems better.

Best of luck!
