2018-9-NFS301-Nutrition Literacy

Instructor: D. Gurfinkel

Duration: 2.5 hours

Please hand in.

Permitted aids: This is an OPEN BOOK test.

Any information on paper, printed or handwritten is permitted. Books also permitted.

Student Name (Please Print)

FIRST NAME:_____SURNAME:_____

Student Number:

1. Answer the questions, below, in the exam booklet provided.
2. There are **THREE** questions for a total of **27 marks**.
3. Be sure to write your name and student number on all exam booklets and number them correctly.
4. **There will be no interpretation of questions to students**. If you think a question is ambiguous, answer it as best you can. You may state your concerns by including comments, in the exam booklet (clearly label them as comments, to separate them from your answers). These will be reviewed by Dr. G after the test.

QUESTION 1:

Below is a forest plot of prospective cohort studies that examined the relationship between isoflavonoids, antioxidants found in fruits, vegetables and legumes, and the risk of type-2-diabetes, as shown by the HR and 95% CI.
