PHY131 Test II Format – Fall 2025

1) Test II will occur in-person on November 18 for the main sitting. If you have signed up for the alternative sittings, the test will occur on either November 18 or November 19 (depending on which sitting you have signed up for).
    a. The test will cover Chapters 7, 8, 10 (up to the end of rotational inertia i.e. no torques), Practical 3 (related to interpreting graphs), and uncertainty in practicals (recall that I decided not to test trigonometry uncertainty in on Term Test I…).
    b. A formula sheet will be provided. You cannot bring in any other aids (like a cheat sheet). You must have a calculator that is non-communicating and non-programmable.

2) The test is 90 minutes. There are three test times:

    a. By default, you will be writing in the **main sitting**, which will occur at **6:15 pm on November 18**. Not everyone will be in the same room. The room you have been assigned is by last name will be posted as an announcement in Quercus.
    b. If you have signed up for **Tuesday's alternative sitting**, it will occur at **4:15 pm on November 18.** If you are signed up for this sitting, you have been contacted regarding your room assignment.
    c. If you have signed up for **Wednesday's alternative sitting**, it will occur at **7:30 am on November 19**. If you are signed up for this sitting, you have been contacted regarding your room assignment.
    d. If you are registered for accommodations through ATS, they will be in contact with you regarding your test time and the location.
