Chapter 6 Practice Questions

PHY131H1F Fall 2024

The Questions and Problems Below are for students who wish to do some *extra practice work*. They are **fully and completely optional,** and are NOT worth any marks.

Most questions are end-of-chapter “Questions” or “Problems” from “College Physics 2e”, by Urone and Hinrichs, ©2022 by Rice University, where the first number is the chapter, and the decimal is either the Conceptual Question number with a Q in front, or the Problem & Exercises number with a P in front. For example, if it says “CP2e OpenStax Q3.16”, it means Chapter 3, Conceptual Question 16. If it says “CP2e OpenStax P10.45”, it means Chapter 10, Problem & Exercise number 45.

The following **Conceptual Questions** can be found at https://openstax.org/books/college-physics-2e/pages/6-conceptual-questions :

Question 1. CP2e OpenStax Q6.8

Question 2. CP2e OpenStax Q6.14

Question 3. CP2e OpenStax Q6.17
