About the midterm test

ACCEPTABLE AIDS: A calculator, pens, and pencils. You may NOT use any other materials.

There will be two parts to this test. Part I is multiple choice questions (30 questions, 1pt each). Part II is five open-ended questions (aprox 2-4pts each). A formula sheet and the relevant test statistic tables will be provided.

The test will be held during class time in our usual classroom.

This practice material has multiple choice, short answer, followed by the appendix and formulas that you will receive during the midterm, and the answer key at the very end.

1. Identify the case in the following statement: The majority of First Nations people living off reserve, Métis, and Inuit people reported that it was very or somewhat important to have health care services that support Indigenous traditional medicines, healing and wellness practices.
